

AMENDMENTS TO THE CLAIMS

The following Listing of Claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (currently amended) An aqueous composition comprising (i) a fluorochemical compound and (ii) an ester derivative of an alpha-hydroxy acid, said ester derivative being chosen from the group consisting of triethyl citrate, tributyl citrate, dibutyl malate, dibutyl tartarate, acetyl triethyl citrate, and acetyl tributyl citrate, and mixtures thereof having a melting point of not more than 35°C and a water solubility of not more than 10% by weight at 25°C; wherein said fluorochemical compound comprises a copolymer comprising (a) fluorinated monomer and (b) a non-fluorinated comonomer, said fluorinated monomer being selected from the group consisting of:

fluorinated monomer according to the formula R_f-X-E , wherein R_f represents a perfluorinated aliphatic group, X represents an organic linking group and E represents an ethylenically unsaturated group;

fluorinated monomer according to the formula $R_f^1-X^1-OC(O)-C(R)=CH_2$, wherein R_f^1 represents a perfluorinated aliphatic group, X^1 is an organic divalent linking group, and R represents hydrogen or a lower alkyl group having 1 to 4 carbon atoms;

and mixtures thereof.

2. (original) An aqueous composition according to claim 1 wherein said ester derivative has a boiling point at 1 atm of at least 150°C.

3. (previously presented) An aqueous composition according to claim 1 wherein said fluorochemical compound is comprised in said aqueous composition in an amount of 1 to 30% by weight and said ester derivative in an amount of 0.1 to 20% by weight.

4-10. (canceled)

11. (previously presented) An aqueous composition according to claim 1 wherein the perfluorinated aliphatic group of said fluorinated monomer has 3 or 4 carbon atoms.

12. (withdrawn) Method of treatment comprising contacting a substrate with an aqueous composition of claim 1.

13. (withdrawn) Method according to claim 12 wherein said method further comprises drying the treated substrate at a temperature of not more than 40°C.

14. (withdrawn) Method according to claim 12 wherein said substrate is a fibrous substrate.

15. (withdrawn) Method according to claim 12 wherein said substrate is contacted with said aqueous composition by spraying, wiping, brushing or foaming the composition on the substrate.

16. (withdrawn) Method according to claim 12 wherein said substrate comprises leather or textile.

17. (withdrawn) Spray can comprising an aqueous composition of claim 1.
